

3/10/2015

REALM Charter School  
2023 8th Street  
Berkeley, CA 94701

The Honorable Monica Reyes,

Address: 2030, San Pablo, CA, San Pablo Avenue

Dear Monica Reyes

I am writing about people throwing away plastic to the ocean. I am a 6th grader at REALM Charter Middle School in Berkeley, California, and I'm concerned about the cancer and poisoning our fish in the ocean and giving cancer. I believe plastic is killing a lot of animals and there is plastic water bottles in the ocean on killing our fish.

- Plastic is killing birds and other living animals that are dying for eating plastic in the ocean.
- Plastic kills the ocean birds and birds are getting hungry and all they got is plastic in there animal bodies.
- PET is plastic water bottles that can cause cancer and birds are getting it and die if we get it we have a chance of dying.
- There is a lot of plastic bags in the ocean and people are not getting any fresh water and fishes are dying if more people throw away trash in the ocean.
- Animals are dying in many ways but a lot of animals die from plastic bags in the ocean and a lot of birds are dying by plastic in there water.

I realize that your schedule is busy, but I would love a written response or phone call to [jonas.g.21@realmcharterschool.org](mailto:jonas.g.21@realmcharterschool.org).

You can send a letter to our school, and I can also be reached by phone at 510 860 6211 or email at [jonas.g.21@realmcharterschool.org](mailto:jonas.g.21@realmcharterschool.org). I will contact your office during b the week of 3/2/2015 - 3/10/2015 to confirm the details of the appointment.

Thank you for considering my request to save the world from plastic.

Sincerely,

---

Jonas Eleazar Garcia

Nestle Headquarters  
Avenue,Nestle 55,1800 Switzerland

Dear Nestle,

I am writing about your products that you sell. I am Tenzin Tsundue, a 6th grader at REALM Charter School in Berkeley,California. I'm concerned about the dangers of these products (e.g: Nestle pure life, Arrowhead, Ozarka, Poland Springs, Deer Park, Ice Mountain,etc.)

I've seen a documentary about your products and the bad things they cause. These harmful products really concern me because it has also killed several people in the past.

I believe that this company has gone to greed and does not care about the the things that are in your products and what it causes. It hurts people and their environment when you guys/girls try to make water bottles. In Texas, most people die due to your factories that cause strong air pollution!

Your products cause many things, and to start off, it causes [cancer](#)! It Kills people at a young age. Another one is that your water bottles are made with [PET](#). It's bad because it causes diseases such as breast cancer.One other cause is [BPA](#) It's bad because It's really dangerous and mimics [estrogen](#). Another cause is [drought](#). You are taking a lot of water which can cause 1% of water in the future. The last reason is pollution. your factories cause pollution all around places like Texas.

Thank you for understanding that your products cause bad things us and the environment. I really do hope you people will change things.

  
Sincerely,  
*Tenzin Tsundue*

REALM CHARTER MIDDLE SCHOOL  
2023 8th street  
berkeley, california 94701

Dear senator Dianne Feinstein

I am writing about all the trash on the pacific ocean. I am a 6th grader at realm charter middle school in berkely, california, and I am concerened about why havent you cleaned the ocean fro the dirty garbage patches in the ocean. I have five reasons why you should clean the ocean.

- The garbage is making what was once beautiful to ugly.
- the water bottles have something in it and then its poison for fish and then they eat it and then we are basically eating poison.
- we are causing birth defects by eating fish and drinking water bottles.
- breast cancer is happening.
- we we are polluting the ocean.

You can send me a call or text to this number: 1(510) 965-7385

Sincerely,  
Edwin Zarz 

March 6, 2015

REALM Charter School  
2023 8th Street  
Berkeley, CA 94701

To the honorable Barack Obama  
1600 Pennsylvania Avenue Northwest, Washington, DC 20500.

My name is Laila Walker. I am from REALM Charter School and I've researched things about bottled water and their negative effects. I believe that plastic bottled water is poisoning us and wildlife.

My first reason is on how our beaches are polluted with plastic. The tide comes in and sweeps the plastic out into the sea where fish eat the plastic. Plastic is like poison pills for them. When we eat the fish, we have a chance of getting cancer from eating too much plastic that animals have been eating. This is a huge problem that's sweeping the nation. 5.25 trillion pieces of plastic are afloat in the ocean right now. This is caused because all plastic bottles aren't burned down. I'm not saying we should burn them either because that releases a super toxin called Dioxin into our breathable air.

<http://oceancrusaders.org/crusades/plastic-crusades/plastic-statistics/>

Almost 1 million seabirds die from eating plastic. But it's not just the animals being contaminated. Plastic bottled water contains petroleum that we consume that can cause birth defects. 80% of petroleum is put into bottled water. I hope that you know Nestle is a Swiss company coming into our land, sucking us dry, and charging us for our own water. Doesn't seem really fair does it. The issue is that the law states that the one with the biggest pump gets the water, which is Nestle, the one with the most money. That's as if I came into your home, stole your food, and sold it to you for much more than it was made.

<http://articles.mercola.com/sites/articles/archive/2011/01/15/dangers-of-drinking-water-from-a-plastic-bottle.aspx>

Hope you take my research into consideration and make a change

Sincerely, Laila A. Walker

March 9th, 2015  
REALM Charter Middle School  
2023 8th Street  
Berkeley, CA 94701

1 Post Street #2450, San Francisco, CA, 94104

Dear Senator Feinstein,

I am writing about the plastic in water bottles that causes diseases, I am 6th grader at REALM Charter Middle School in Berkeley, California, and I'm even more concerned about the toxic that's in the plastic. I have five reasons about why I am writing this letter to you.

- First of all the plastic water bottles have harmful toxic to humans. (BPA)
- There's plastic in the oceans which are harmful to the sea creatures in the oceans, and because we eat those animals that may have eaten those poison pills now may have gotten in our bodies.
- A part in Hawaii has plastic bottles from the U.S that wash to their shore because of our littering.
- Birth defects and cancer is what upsets me even more. Pregnant women drink and crush plastic water bottles and are leaving it out in the sun! The chemicals from the plastic are harmful to her and the fetus.
- The petroleum built in the factories has toxic in it. Those gases from the factories are in our air. We need fresh air not compressed air. When our community breaths that it's bad for our lungs and begin to get asthma.

I realize that your schedule is busy, but I would love a written response or an email to [@nadyaly.e.21@realmcharterschool.org](mailto:nadyaly.e.21@realmcharterschool.org) Thank you for considering my request to figure out a new way to store water and doesn't cause something that can harm us.

Sincerely,

Nadyaly Eijigas

3/10/15

To: 112 Hart Senate Office Building Washington DC 20510  
From: REALM Charter School  
2023 8th Street  
Berkeley, CA 94701

Dear Honorable US Senate Barbara Boxer,

I am writing about BPA in water bottles. I am a 6th grader at REALM Charter Middle School in Berkeley, California. I would love for the packaging of water bottles to be changed, but I am most concerned about how BPA affects human beings and sea life. I believe that plastic in water bottles are NOT safe for the environment because..

Reason 1) BPA \*the main part of plastic\* causes birth defects and cancer. For more info go to:  
[www.factsaboutbpa.org](http://www.factsaboutbpa.org)

Reason 2) Garbage patches \*filled with plastic\* are twice the size as Texas. For more info go to:  
<http://science.howstuffworks.com/environmental/earth/oceanography/great-pacific-garbage-patch.html>

Reason 3) Fish mistake the tiny plastic particles as food, and get poisoned.  
For more info go to:

<http://www.foodmanufacturing.com/articles/2014/12/01-i-being-poisoned-eating-fish-my-plate>

Reason 4) Plastic factories leads to pollution. For info go to:

<http://www.mountainairforce.org/whats-plastic-got-to-do-with-clean-air/>

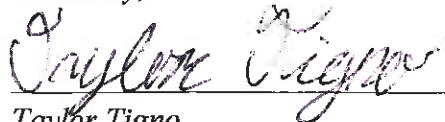

Reason 5) Many life risking chemicals are used to make the plastic. For info go to:

<http://www.environmentalhealthnews.org/ehs/news/dangers-of-plastic> (please read everything on the website, top to bottom).

I realize how busy your schedule is, but I would love a written response to:

[taylor.t21@realmchartermiddle.org](mailto:taylor.t21@realmchartermiddle.org). You may also send a letter to our school. Thank you for considering my request to change the packaging of water bottles.

Sincerely,

Taylor Tigno.

Nestle Avenue Jean Jaurès  
08400 Challerange France

Dear Nestle,

My Name is Emmett Campbell, 6th grade student at REALM Middle School in Berkeley,CA.

We watched the horrifying film "Tapped" on the bottled water industry's impact on big and bad things like droughts,PET,the recyclable things not being recycled mostly bottle water.And all the money you make off of this horrible thing and the greed you have.

If you have a heart,why are you taking our tap water putting cemailes and selling it back to us.And all so you taught you could get away with this,unseen.This is just really bad.If you don't stop a lot of people will not have water,and you will be to blame.And you try to control our government by paying them,thats just sick.

You care more about money than people.And you don't care about killing people slowly all you care about is money.And you know what is works,you trick work that is the sickest thing of them all.But you can change.And truly do something for the the people.

You can do something for the the world you,are a big industry.You can change the world.And you will get more people be the biggest the beats or you can lie more and honorable. Here are some sites

Berkeley,CA 94701

The Honorable Shaytards,  
Maker Studios 12950 culver Blvd.  
suite 150 Los Angeles,CA 90066

Dear Shaytards,

I am writing about how water bottle companies.I am a 6th grader at REALM charter middle school in Berkeley, California, and I'm concerned about our society.I believe that water bottle companies are hurting our societies and our lives it is important to know about this so we know what are good and bad things in our society.

Cancer from BPA (BPA breast cancer fund) bpa can cause breast cancer and most people could get breast cancer from bpa from the water they drink.

There are Animals dying from plastic from the ocean and other places.For example if the fish eat the plastic we eat the fish so the fish and us get hurt.  
Droughts the water companies are causing droughts and taking water from different places like lakes etc. Chemical pollution in the air from the plastic and other things which there is also chemicals in the water bottles.

Disease water bottles the water bottles can cause disease's from the different chemicals that are used in the plastic water bottles. All the facts I stated I found on Breastcancerfund.org , smythoningmagazine.org , nrdc.org, and cdc.org

I realize that your schedule is busy,but i would truly love a written response or a phone call to (510)697-4750 or a email adress at [lizabeth.m.21@realmcharterschool.org](mailto:lizabeth.m.21@realmcharterschool.org). I will contact your office during the next one or two weeks to confirm the details of the appointment.

Thank you for considering my request to help us change what water bottle companies!

---

REALM Charter School  
2023 8th Street  
Berkeley, CA 94701

Michelle Obama  
The White House  
1600 Pennsylvania Avenue NW  
Washington DC 20500 mUSA

Dear The Honorable Michelle Obama,

My name is Jasmine Farmer, I am a 6th grader at Realm Charter Middle School in Berkeley, California, and I am very concerned about BPA killing people. My classmates and I have watched an illuminated film called "Tapped" on bottled water industry 's impact on droughts, the harmful effects of the BPA in PET and bottled water, the greed of Nestle, Coca-Cola, Pepsi, and privatization of groundwater sources.

I truly believe that plastic bottle using is bad for our country, a lot of people are dying from it. It's important because a lot of people get cancer, birth deictics, pollution, and dying fish. There are also government lies.

What people don't know is that tapped water is filtered to make it into clear water. Bottled water is not healthy, because when it's hot or any movement it makes the particles fall off the water bottle, it floats in the water and we drink it. YUCK!!!!

We went on the Internet and found a lot of things about BPA and water bottles, we found a lot of websites for cancer, government lies, birth defects, dying fish, and pollution.

Cancer: [www.breastcancerfund.org](http://www.breastcancerfund.org)

Government Lies: [NationalGeographic.org](http://NationalGeographic.org)

Birth Defects: [Environmental Working Groups- Birth Defects](http://EnvironmentalWorkingGroups.org)

Dying Fish: [PlasticStatistics/OceanCrusaders.org](http://PlasticStatistics/OceanCrusaders.org)

Pollution: [PossibleWaterContaminant-ECORINews](http://PossibleWaterContaminant-ECORINews)

I truly believe you can make a difference by protecting us, and helping write good laws to prevent all of these issues I listed above.

I realize that your schedule very busy, because you're the president of the US, but I would love a written response or a phone call at (510) 502-3009. You can send a letter to our school, and can also be reached by email at [jazzyj3@icloud.com](mailto:jazzyj3@icloud.com). I will contact your office during the week of 1-2 weeks before the visit, to confirm the details of the appointment. Thank you for time.

Sincerely Jasmine Farmer

Jasmine

REALM Charter School  
2023 8th Street  
Berkeley, CA 94701

ADDRESS:

Dear

I am a 6th grader at REALM Charter Middle School in Berkeley, California, and I'm concerned about how many people buy the plastic, and where it goes when it's done. I am writing about your gas station because you are our neighborhood store and here are some stuff you might not know about your store .

I believe that plastic bottles is the issue and you should stop selling it because. It has been linked to cancers, neurological defects, diabetes and obesity. ([www.foxnews.com/health](http://www.foxnews.com/health)). There is way too much Pollution when their making these bottles ([www.fox.com](http://www.fox.com)) You could go days without food and hours without water, but you would last only a few minutes without air. However, did you know that breathing polluted air can make you sick?

Too many dying fish and animals thinking plastic is food. [NOAA.com](http://NOAA.com) This website As plastic cannot be digested, it sits in the stomach without being able to go anywhere. Eventually, the digestive tract becomes blocked. Not only is the whale unable to clear this blockage, but it is also unable to eat any real food as well.

There's more plastic than plankton in the water! ([sea.edu](http://sea.edu)) "The term "garbage patch" is very misleading – there are no large islands of trash floating in the open ocean. There's way too many droughts! ([www.enbc.com](http://www.enbc.com)) "California's severe drought now in its third year has led to major hardships in the state. From water bottle companies taking water from rivers and lakes. I realize that your schedule is busy, but I'd love to hear a written response from you. You can contact my email at [deborah.p.21@realmcharterschool.org](mailto:deborah.p.21@realmcharterschool.org) You can send a letter to our school, and I can also be reached at my email. Thank you for considering my request to stop selling plastic water bottles.

Sincerely,

Deborah Pereira

Tuesday March 10, 2015

REALM charter school  
2023 8th Street  
Berkeley, CA 94701

The Honorable Michelle Obama

1600 Pennsylvania Avenue, Washington, DC

I am a 6th grade student at REALM charter school in Berkeley, California, and I am very concerned about the water bottle company selling our communities tap water and bottling it up.

My first issue is that water bottles can cause cancer and birth disorders. This is harmful because cancer kills people and when birth disorders happen the parents usually kill the baby. I found this information from the documentary "Tapped"

My second issue is that Nestle is advertising that tapped water is bad and they are using tap water in their product. This is harmful because if we believe that their advertising is accurate, they start drinking basically bottled poison. I also found this information from the documentary "Tapped".

My third issue is that because of Nestle, Coke, Pepsi, ETC are bottling the nations water, the world is running out of water. This is the worst issue of them all because if the world runs out of water, humanity itself will die away.

I realize your schedule is busy, but I would love a response. You can email me at [aidan.b.21@realmcharterschool.org](mailto:aidan.b.21@realmcharterschool.org). Thank you for considering to read my letter on stop water bottle company.

Sincerely,

Aidan Browne

Tuesday March 10,15

REALM Charter School  
2023 8th Street  
Berkeley, CA 94701

Avenue Nestle 55 Vevey, Switzerland

Dear Nestle,

I am a 6th grader at REALM Charter Middle School in Berkeley, California. In our social studies class we watched a film called "Tapped", its about the water bottle industry and how they cause droughts and harmful things like birth defects and the harmful effects of BPA in PET & bottle water .

I believe in ending plastic water bottles is important because...

Birth defects. From all the chemicals in the bottle . The woman drinks it and all the chemicals that are in the bottle of water go into the woman's body then goes to the body and its in the baband that can cause the birth defect. I found that research on [www.mecetallcycles.com](http://www.mecetallcycles.com)

Another reason is because of the pollution. When you make the bottle for the water the chemicals from it are basically thrown outside and going to the people who live in the community of that factory and thats when the people who live there start to get lung cancer because of the pollution that is happening in that community.I found that information from [www.thewaterproject.org](http://www.thewaterproject.org).

Then there is more plastic than plankton in the water. 280 million of plastic is produced around the world annually.And an estimation of 5.25 trillion plastic pieces weighing 268,940 tons pollute the global ocean. I found this information on [www.algalini.org](http://www.algalini.org).

We also found out that BPA can cause cancer .In a small study published in *PLOS ONE*, The scientists observed the presence of high levels of BPA in men with prostate cancer: they also found that BPA exposure disrupts cell division, potentially affecting cancer's development.This information was found on [www.foxnews.com](http://www.foxnews.com). Then last of all the plastic from the garbage starts to make the garbage patches.The Great Pacific Garbage Patch is a soupy collection of marine debris—mostly plastics. This information was found on [www.nationalgeographic.com](http://www.nationalgeographic.com).

I realize that your schedule is busy, but I would love a written response or a phone call to [hvaleria054@gmail.com](mailto:hvaleria054@gmail.com) .

You can send a letter to our school, and I can also be reached by phone at 510-375-5868 or another email you can send it to [valeria.h.21@realmcharterschool.org](mailto:valeria.h.21@realmcharterschool.org), and I will contact your office during the week of to confirm the details of the appointment.

Thank you for considering my request to eliminate water bottles and to stop making water bottles.

Sincerely,

  
Valeria Hernandez

March 9, 2015

REALM Charter School  
2023 Street  
Berkeley, CA 94701

Dear Sen. Loni Hancock,

I am writing about the BPA, an industrial chemical that has been used to make certain plastics. I am a sixth-grader at REALM Charter Middle School in Berkeley, California. I am concerned about this because, some research has shown that BPA can seep into food or beverages from containers that are made with it. It is harming people and animals. Exposure to BPA can cause bad health effects to the brain, people's behavior, harm to children and infants, and cause birth defects.

BPA is found in polycarbonate plastics. Polycarbonate plastics are often used in containers that store food and beverages, such as water bottles. They may also be used in other things we buy and use. Plastic statistics/ocean Crusaders help fight pollution and tell people about what's happening to the ocean. They say the majority of the trash in our ocean is made from plastic. There is an island called Great Pacific Garbage Patch. This is an island made out of debris in the North Pacific Ocean. It is simply a collection of a marine debris and trash and it forms a whole island and this is bad. BPA can cause cancer. Studies have shown that there are more than 100 types of cancer and if this pollution of BPA products continues to seep into our oceans and into people they will continue to get very sick.

I know that we should buy water filters to help reduce BPA. We can buy things that say they are BPA free. Maybe, we should make more things like that. Also, cut back on using foods and drinks in cans. We should not heat things in a microwave because it can break down the plastic. Maybe, you can make law so that we can only use products that don't have this, like glass or stainless steel, to reduce the amount of pollution and people getting sick.

I realize that your schedule is busy, but I love a written response to [erik.w.21@realmcharterschool.org](mailto:erik.w.21@realmcharterschool.org). I will contact your office in two weeks for my visit to confirm the details of this appointment. Thank you for considering my request to change the law so that BPA won't continue to harm us.

Sincerely,

*Erik Whitemon*

Erik Whitemon

Tuesday March 10, 2015

REALM Charter School  
2023 8th Street  
Berkeley, CA 94701

The Honorable Onika Maraj  
1601 Cloverfield Blvd Tower Suite  
200 Santa Monica, CA 90404

Dear Onika Maraj,

I am writing about Nestle lying about their water. I am a 6th grader at Realm Charter Middle school in Berkeley, California, and I am concerned about the water. I believe the issue is the stuff in the plastic. This is important to me because in 2030  $\frac{2}{3}$  of the world will have no water, and the chemicals in the plastic gives people diseases. The chemicals in the plastic can give people Cancer, and this is bad because, it kills people at a young ages, and old.

This company causes droughts, and this is bad because it limits the amount of water we have. The chemicals in the plastic also cause Birth defects and this is bad because, researchers found that rhesus monkeys exposed to BPA suffered to serious reproductive issues.

In a recent study by german researchers, nearly 25,000 chemicals were found in a single bottle of water, many of these chemicals mimic the effects of potent pharmaceuticals inside your body, according to the study published in the journal "PL.os one."

This company also causes dying fish because of the lack of water the fish have to swim in. The chemicals cause Estrogen problems this is bad because, it stops the reproductive system for men. BPA is a weak synthetic estrogen found in many rigid plastic products.

I realize you're schedule is really busy because you're Nicki Minaj, but I would love a response to my email [chaz.c.21@realmcharterschool.org](mailto:chaz.c.21@realmcharterschool.org). Thank you for considering my request to end promotion of bottled water.

Sincerely,

A handwritten signature in black ink that reads "Chaz Clark". The signature is written in a cursive style and is positioned above a horizontal line.

Berkeley, CA 94701

The Honorable Barack Obama  
1600 Pennsylvania Ave NW,  
Washington, DC 20500

I'm writing about the chemicals that get in our water, I'm a 6th grader at REALM Charter Middle School, California, and I'm concerned about our health.

I believe that Nestle water bottles have chemicals in our water that makes us sick and that gives us cancer, and might even make us die.

Chemicals, the plastic that they use to make the bottle part has chemicals in it that makes us sick or can give us cancer. ScienceDaily.com

Droughts, Nestle takes water from specific places and takes all their water and leaves that city/state in a drought. Addicting info.org

Lying, Nestle lies and says that they get it from the mountains but 40% of that is just plain old tap water.

[huffingtonpost.com](http://huffingtonpost.com)

Fish Population, they dump all the plastic in the ocean and the fish start eating the plastic and the fish get sick we catch that fish we eat the fish and we get sick because we are basically eating plastic.

[EndangeredSpeciesInternational.org](http://EndangeredSpeciesInternational.org)

Cancer, the plastic leaks into our water and it has BPA, PET, and PETE that gives us cancer.

[BreastCancerFund.org](http://BreastCancerFund.org)

I realize your schedule is busy, but I would love a response or a call to (510)-860-1513 or a email at [alana.b.21@realmcharterschool.org](mailto:alana.b.21@realmcharterschool.org).

Thank you for considering my request to change the plastic so it doesn't have those nasty chemicals in them so no one will get cancer.

Sincerely,

  
*Alana Burt*

Tuesday March 10, 2015

REALM Charter School  
2023 8th Street  
Berkeley, CA 94701

The Honorable Barack Obama  
1600 Pennsylvania Avenue NW  
Washington DC 20500

Dear Mr. President,

I am writing about how bottled water can kill you. I am a 6th grader at REALM Charter Middle School in Berkeley, California and, I'm concerned about water bottles. This is really important to me because I don't want people to die or get hurt.

I believe that water bottles can kill you. This is really important to me because I don't want people to die or get hurt.

One of the reasons is that the water bottles can cause Cancer from the BPA and it's bad because it can kill people at a really young age. I found this from <http://www.breastcancer.org/>

My second reason is that it's causing pollution in our fresh waters and it's bad because we're not going to have fresh water to drink. I also found this from <http://kids.nationalgeographic.com/>

My third reason is that it's killing animals and fish and it's bad because it's poisoning fish and then we're going to eat the fish, which it's poisoning us. I found this from a local Marine Research Foundation.

My fourth reason is that the water bottles are basically tap water with chemicals and it's bad because they are stealing our water then putting chemicals, then reselling it to us. I got this from MyDiet.com

My last reason is that it's creating desertification and it's bad because people are losing their recreational areas and losing their land with water they paid for. I got this information from MotherJones.com.

I realize your schedule is busy, but I would love a response to my email at [Alyssa.L.21@realmcharterschool.org](mailto:Alyssa.L.21@realmcharterschool.org).

Thank you for considering my request to changing how water bottles are made and from.

Sincerely,

Alyssa Lim

REALM Charter School  
2023 8th Street  
Berkeley, CA 94701

The Honorable Fifth Harmony  
9 Derry Street  
London, UK

Dear Fifth Harmony,

I am writing about to you about bottled water. I am a 6th at REALM Charter Middle School in Berkeley, California, and I'm concerned about if you drink bottled water??

I believe that bottled water is not good this is important because:

Only 1% of earth's water is drinkable. I found this information at scribol.com.  
Groundwater is nearly drained. I found this information at news.nationalgeographic.com  
BPA mimics estrogen. I found this information at news.nationalgeographic.com. Another reason is that fish are dying. I found this information at articles.LAtimes.com

The last reason is that if you buy bottled water you are just wasting your money because you can just get your water out of the tap. I found this information at elua.com.

I realize that your schedules are busy, but I would love if a written response or a phone call to me, Isabel Gonzalez. You can send a letter to our school, and I can also be reached by phone at (510) 610-8491 or email at [isabel.g.21@realmcharterschool.org](mailto:isabel.g.21@realmcharterschool.org). THANK YOU for considering my request to not using bottled water.

Sincerely,

1600 Pennsylvania  
Avenue Northwest,  
Washington, DC 20500

Dear Barack Obama,

My name is Ben, and I am a student at REALM Middle School in Berkeley, CA. We watched the film "Tapped" on the bottled water industry's impact on droughts, the harmful effects of the BPA in PET & bottled water, the greed of Nestle, Coca-Cola, Pepsi, and privatization of groundwater sources.

Cancer is bad enough but now we find that the plastic water bottles from Nestle are poisonous. According to Breast Cancer Fund, BPA can give cancer from the plastics in the bottles. Pollution is a serious problem it causes things like the Pacific garbage patch. According to The Water Project, we have increased too much in pollution over the past 6 years.

What Nestle is doing is using false advertising to lure people to buy the plastic water bottles, and according to Natural Society, the Nestle corporation says they give you pure drinking water, but they mostly use tap water!

Water scarcity is getting more, and more serious by the day. according to The Speaker, scientists have predicted we will have a very low source of water by 2020.

My final reference is birth defects that can happen. According to Unknown Country plastic from Nestle water bottles has been linked to birth defects.

I hope you will think about my reasons to not drink Nestle's plastic water bottles, which is convenient, but in the long run is not worth it.

Sincerely,

Benjamin Cardoza

MARCH 10TH 2015

REALM CHARTER SCHOOL

BERKELEY, CA 94701

ADDRESS:

Dear Barbara Boxer,

I am writing about the bottle water companies. I am a sixth grade at Realm Charter Middle School in Berkeley, California and I am concerned about what they make the plastic bottles out of and why its making us sick.

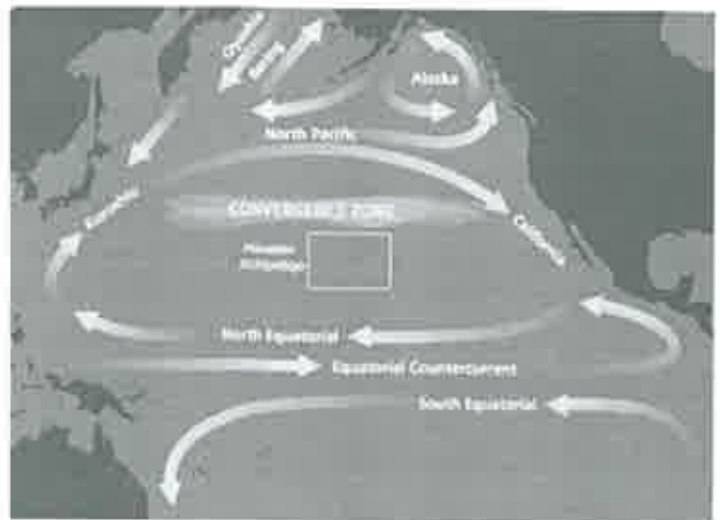

They bottle water industry are putting Bpa and Pete in are water and its getting us very sick and giving us cancer and making us die. We are testing are water and we are finding all this toxic stuff in are water because the plastic water bottles have petroleum in the water bottles. Coca-Cola and Pepsi and there plastic water bottles have toxic chemicals in the bottles. We have garbage patch in the Pacific Ocean and it is all plastic and its as large as Texas. The plastic water bottles are also causing birth defects when these women are having babies they're babies have defects.

The bottled water companies are also making our kids really sick cause of the sippy cups and the baby bottles and there nipples on them cause they're made out of plastic. This is This a picture of The Garbage patch in the Pacific Ocean, It is as big as Texas.

Sincerly,

*Malia Koch*

2023 8th street  
Berkeley, CA 94612

ADDRESS: *Whitehouse, Washington D.C. 1600 Pennsylvania Ave.  
Nw, DC, 20500*

Dear President Barack Obama,

My name is Victor H. Dubon 6th grade student of Realm Charter School in Berkeley, CA. We watched the documentary "Tapped", which is based on the Bottled Water industry. I'm going to tell/show you what NESTLE does to America and the rest of the world.

Cancer from B.P.A: In January 7, 2014, Exposure to low levels of bisphenol A during development may make men more susceptible to prostate cancer later in life, according to a new study. This is very agitating for me with it being cautious & hazardous. - *CancerFunds.org*

Pollution: "But all those plastic bottles use a lot of fossil fuels and pollute the environment. In fact, Americans buy more bottled water than any other nation in the world, adding 29 billion water bottles a year to the problem. In order to make all these bottles, manufacturers use 17 million barrels of crude oil. That's enough oil to keep a million cars going for twelve months." - *NationalGeographic.org*

Death to fish: Ocean Crusaders are aware that plastic bags and plastics kill marine life, not to mention being a much broader environmental hazard. With over 46,000 pieces of plastic in every square mile of ocean, it is time to take action to protect our marine life and our way of life. marine life/Birds die of this situations then we eat the fishes, dolphins, and birds probably not the birds though. - *Ocean Crusaders.org*

Dishonesty: Nestle had said things like "this water comes from right from the mountain streams" or "oh this water is so pure it's healthy for you" even though it's filtered water and then filtered again. They just straight up lying to everyone. - *Nestle Critics.org*

Garbage patches: The Great Pacific Garbage Patch is a collection of marine debris in the North Pacific Ocean. Marine debris is litter that ends up in oceans, seas, and other large bodies of water. Wow. - *Education. National Geographic.org*

I realize that you are seriously busy, but i would love a written response or phone call to [victor.d.21@realmcharterschool.org](mailto:victor.d.21@realmcharterschool.org). And I can also reach you by e-mail [victor.d.21@realmcharterschool.org](mailto:victor.d.21@realmcharterschool.org). THANK YOU for my request to END water bottles to end.

Sincerely,  
*Victor Dubon*

REALM Charter School  
2023 8th Street  
Berkeley, CA 94612

Dear Mayor Tom Bates,

I am writing to you about the corporate lies and pepsi cola greed. I am a 6th grader at REALM Charter Middle School in your city of Berkeley, California. My name is Loreal Moore and i am very concerned. There have been so many studies that show how plastic water bottles, ruin our environment in 3 main ways:

- It causes cancer because the BPA inside of the plastic that we've been using to make plastics.
- It's extremely harmful to our ocean and marine life in our bay. Fish and other sea animals die because we think it's that the ocean is a gigantic garbage can. We honestly don't know how bad our ocean's are near the Pacific Garbage patch. People don't normally go to the ocean every day and notice these things that could cause harmful things to our environment.
- People who work for companies like Nestle and Pepsi Cola, drain and pump water from Maine without the cities permission. I am saying that the citizens should have a choice! Scientists have proven that 77% of Earth's water is only 1% drinkable. That percentage changes so much and while people in Berkeley are sitting on their couches, drinking out of bottled water not thinking, "Where did this come from?" Well, it came from your lakes and streams and you're not doing anything about it.

I know you have the soda tax and all, but if you can do that, you can ban plastic water bottles. The next step is to ban plastic in all.

I realize your schedule is busy, but i'd enjoy a written or typed response at my email: [loreal.n.21@realmcharterschool.org](mailto:loreal.n.21@realmcharterschool.org) or 510-647-9818. Thank you so much for your time and energy to read my letter and at least try to make a difference.

Sincerely,

A handwritten signature in blue ink that reads "Loreal Moore".

REALM Charter School  
2023 8th Street  
Berkeley, CA 94701

Berkeley Petroleum-Econo Gas  
950 University Ave Berkeley, CA 94710

Dear owners of the Berkeley Petroleum-Econo Gas Station,

I am a 6th grader at REALM Charter Middle School in Berkeley, California, and I'm concerned about how many people buy the plastic, and where it goes when it's done. I am writing about your gas station because you are our neighborhood store and here are some stuff you might not know about your store .

I believe that plastic bottles is the issue and you should stop selling it because. It has been linked to cancers, neurological defects, diabetes and obesity. ([www.foxnews.com/health](http://www.foxnews.com/health)). There is way too much Pollution when their making these bottles ([enr.com](http://enr.com)) You could go days without food and hours without water, but you would last only a few minutes without air. However, did you know that breathing polluted air can make you sick?

Too many dying fish and animals thinking plastic is food. [NOAA.gov](http://NOAA.gov) As plastic cannot be digested, it sits in the stomach without being able to go anywhere. Eventually, the digestive tract becomes blocked. Not only is the whale unable to clear this blockage, but it is also unable to eat any real food as well.

There's more plastic than plankton in the water! ([sea.edu](http://sea.edu)) "The term "garbage patch" is very misleading -- there are no large islands of trash floating in the open ocean. There's way too many droughts! ([www.enr.com](http://www.enr.com)) "California's severe drought now in its third year has led to major hardships in the state. From water bottle companies taking water from rivers and lakes. I realize that your schedule is busy. but I'd love to hear a written response from you. You can contact my email at [deborah.p.21@realmcharterschool.org](mailto:deborah.p.21@realmcharterschool.org).

You can send a letter to our school, and I can also be reached at my email. Thank you for considering my request to stop selling plastic water bottles.

Sincerely,

Deborah Pereira

Tuesday March 10, 2015

REALM Charter School  
2023 8th Street  
Berkeley, CA 94701

Dear Barack Obama,

My name is Kole T. White I go to a wonderful school called Realm Charter school and today i just wanted to write how i feel on these water bottles and how it is affecting our life.

If your family is like most Bay Area families, unloading the groceries includes hauling a case or two of bottled water into your home. On your way to a soccer game or event, its easy to grab a cold one right out of the fridge, right?

In fact the water bottles that we drink today is hurting the baby who drinking it today, in the plastic has chemicals that are poison in the plastic. and the poison gets into the water and makes us have cancer or disorder .

Nestle is saying it is pure and it makes you smarter but it is all fake and it makes you have problems.

I fact there might no water in 2020 because Nestle is taking water from the public lake and what happens when they run out of water in all the lakes .

*Kole T. White*

Berkeley, CA 94612

The Honorable Mum  
1239 Channing Way  
Berkeley, CA 94612

Dear Mum,

Bottled water is bad, because it causes fish poison. This is bad because it is poisoning us. It is also poisoning sharks and birds. They are dying because of this poison that plastic bottles are giving them.

*You can find this information by watching the Tapped movie*

Plastic bottle factories are causing breast cancer. This is bad because humans are dying and are going through a lot of pain and suffering.

*I got this info from the BPA website*

Even though plastic water bottles are convenient it is causing birth defects to kids being born by pregnant mums drinking bottled water.

*I got this information from Tapped documentary*

Nestle is over pumping water and drying up the lakes. They don't even pay tax! This is bad because things like fish and other sea animals are dying and have no place to live and can't breathe water.

*I got this information from my brain*

The plastic on plastic water gets thin and breaks down into the water that we drink. This is really bad because plastic is really bad for us and causing all the things I just listed.

Sincerely

Shiloh

Berkeley, CA 94701

The Honorable Michael Jordan  
5335 Wisconsin Avenue NW, Suite 728  
Washington DC, 20015 USA

Dear Michael Jordan,

I am writing about the bottled water company, Nestle, slowly drying our planet. I am a 6th grader at REALM Charter School in Berkeley, CA, and I'm concerned about our planet.

I believe Nestle is drying our home planet. The plastic water bottles that Nestle made, can cause cancer from the BPA it has. It can also cause breast cancer. You can find this information at [breastcancerfund.org](http://breastcancerfund.org).

Water bottles aren't being recycled, so they end up in ocean and beaches. The trash in the water is bad enough. But then the fish eat the plastic and get poisoned. After that, we catch the fish and eat it. I found this information at [ocean.nationalgeographic.com](http://ocean.nationalgeographic.com).

The factories that makes the plastic pollutes the air. It's bad for the community to have all that pollution. This information was found at [stoppestnewwater.org](http://stoppestnewwater.org).

If you drink the water from the Nestle water bottles when you're pregnant, it can cause birth problems. I found this information at [kidspot.com.au](http://kidspot.com.au).

Some drink bottled water because they think it's better than tap water, but local governments make sure water from the faucet is safe. Chemicals from the plastic goes into the water we drink. This information was found at [m.vebnet.com](http://m.vebnet.com).

If you could make a speech about Nestle, your followers will believe you and help change the world with your speech.

Thank you for your time. You can reach me at REALM's address, or call:  
(510) 230-9820.

Sincerely,

Devin Saechao

2023 8th street  
Berkeley CA 94701

Stephen Curry  
c/o Golden State Warriors  
7000 Coliseum Way  
Oakland, CA 94621

Dear Stephen Curry,

My name is Khari Johnson I am a 6th grader at REALM charter middle school in Berkeley CA. We have watched a clip about bottled water company. The impact of these bottled industry's impact on droughts, the harmful effects of BPA in PET and bottled water the greed of most of those industry's and for ground water.

Cancer from BPA is very serious because people are dying and according to washington state study. Fish are dying because of bottles and other garbages is getting into the ocean and harming are sea life. I found this on FOX news and on the internet.

Birth defects are are when the mother drinks from a bottled water and all of those chemicals get into the water and it also causes miscarriages. I found this also on FOX news. But most of those plastic bottles use tons of fossil fuels and pollute our environment. Factories use 17 million barrels of crude oil to make bottles. That is enough oil to fuel 1 million cars.

False advertisement gets me really upset because when I look at and add for bottled water and it says non harmful but really is not that gets me upset. Because I don't want to hurt our environment.

What I want you to change is for you to stop drinking bottled water and to tell your teammates to stop drinking coke and nestle. And to use reusable bottles to drink water.

Thanks for the time. You can reach me on my email [khari.j.21@realmcharterschool.org](mailto:khari.j.21@realmcharterschool.org).  
Sincerely,

  
Khari Johnson

Jonathan Walker

To:  
Avenue Nestle 55 Vevey, Switzerland

From:  
REALM CHARTER SCHOOL  
2023 8<sup>th</sup> street  
Berkeley, CA 94701

Dear Nestle,

I am writing to tell you that what you are doing is really bad. You say you are helping prevent breast cancer, yet you are actually contributing to people having breast cancer with your PET (Polyethylene terephthalate) bottles, according to Mother Jones 2014 article *The Scary New Evidence on BPA-Free Plastics*. BPA can increase estrogen levels which is bad for both men and women.

The point I am trying to make here is, NO MORE PLASTIC! You are polluting the world and it is really bad, you say you are only taking .05% of drinking water, guess what, only 2.5% of water in the world is fresh drinking water according to the National Geographic Society. That's not a lot of water and we can't filter the other 68.5% of salt water.

I am writing to ask you to please stop double filtering tap water because you say tap water is bad but actually sell us tap water. I will tell people not to buy bottled water and encourage people to drink out of the tap.

I am asking one more thing, don't be shy tell the world or the students of REALM middle school will tell the world for you.

Thank you for your time,

Tuesday March 10, 2015

REALM Charter School  
2023 8th Street  
Berkeley, CA 94701

The Honorable President Barack Obama  
1600 Pennsylvania Avenue, NW  
Washington, DC 20500

Dear President Barack Obama,

I am writing about the the negative effects that water from plastic bottles could have on us. I am a 6th grader at Realm Charter Middle School in Berkeley, California, I am concerned about the health of our people.

I believe it is wrong how water companies are sucking all the water that we all need and how water companies are using petroleum to make plastic water bottles. This is really important to me because if water companies keep sucking the water, there will be no more water in the year of 2030 or be a few water left. I am going to explain why we need to stop drinking out of plastic water bottles. Cancer: Cancer could kill us and plastic water bottles could cause cancer. A website that you can look at is: [BreastCancerFund.org](http://BreastCancerFund.org).

Birth Defects: If you drink out of water bottles all the time and if you want to have a baby, it will not form right, and you could not have a baby, same things go for womens, not just for men. Washington State University and UC Davis

Bisphenol A(Bpa) and , Polyethylene Terephthalate (P.E.T) are known chemicals that are use to produce water bottles. These chemicals are very harmful, and it can cause cancer. Who.Int/World Health Organization.

Petroleum: Petroleum is used to make the plastic water bottles, the bad thing is that the water is touching the plastic, so basically america is drinking oil, which is bad and it could cause cancer. A website that you can look at is: [Health Wyze.org](http://HealthWyze.org).

Kills animals: Fish and other sea creatures are eating plastic. Sometimes fish die from eating plastic and we eat fish, America is basically eating plastic because fish is eating it, and we are eating the fish. People should recycle, but instead people throw plastic water bottles all over the ground. There is a website that you can look at, it's called World WildLife.org.

I realize you're is busy, but I would love a response to my email: [Oluwatobi.b.21@realmcharterschool.org](mailto:Oluwatobi.b.21@realmcharterschool.org).

You can send a letter to our school, and I can also be reached by the school phone number at: 510-809-9800. I will contact your office during the week of(1-2 weeks before the visit) to confirm the details of the appointment. Thank you for considering my request to do something about water bottles and if you can do something to make these companies to stop using these chemicals to make water bottles. By so doing we can live in a more friand and a healthy environment.

Sincerely,

Tobi Babaoye

Berkeley, CA 94701

The Honorable Jennifer Aniston  
9150 Wilshire Blvd, Suite 350  
Beverly Hills, CA 90212

Dear Ms. Aniston,

My name is Nile Miller, a 6th grade student at [REALM Middle School](#) in Berkeley, CA. We Watched the illuminating film "Tapped" on the bottled water industry 's impact on droughts, the harmful effects of BPA in PET & bottled water, the greed of Nestle, Coca-Cola, Pepsi, and privatization of ground water sources.

Bottled water is extremely convenient but the convenience might be the cause of the failing ecology of the world.

- The first reason is that the [PET causes cancer](#) and cancer is killing thousands of people around the world.
- The second reason is that the bottles are being littered and going into the [ocean](#) and lowering the fish population by millions.
- The third reason is that pumping water is happening in a select few places and draining the lakes which is [causing drought](#) and lower water levels.
- The fourth reason is the huge amount of trash left over, it all eventually gets washed into the ocean and forms [a giant garbage patch](#). This is disgusting.
- The last reason is that [BPA mimics estrogen](#) which causes reproductive harm in men.

Thank you for considering my request to end the bottled water tycoon in order to make the world a better place.

Sincerely

*Nile Miller*

The Honorable Kim Kardashian - smooch for kids  
8420 melrose Avenue  
West Hollywood, CA 90069-5306 USA

Dear Kim Kardashian,

My name is Xitlali Salgado, i'm a 6th grade student at REALM Charter Middle school in Berkeley, CA. And i'm writing about Nestle's plastic bottles. We watched the illuminating film "Tapped" on the bottled water industry's impact on droughts, the harmful effects of BPA in PET & bottled water, the greed of Nestle, coca-cola, pepsi, and privatization of groundwater sources.

I Believe that Nestle's plastic water bottles are unhealthy. This is important to me because it's dangerous to people's health. Cancer can be caused by plastic water bottles. This is dangerous because it's killing people. Bottled water are also the cause of droughts. This is bad because it's making the world not have water. Plastic bottles cause birth defects. This is bad because it's unhealthy for babies and it can cause them to be born with a disorder.

There are more than 24,500 chemicals in plastic water bottles. This is bad because kids, babies, and adults are getting sick of all the chemicals.

Plastic water bottles are causing pollution because the bottles are being thrown away into the ocean. This is bad because there's fish in the ocean and the fish are eating the plastic in the bottles and we eat fish the means were eating the plastic from the fish. Here are some web sites I visited Cancer.com, SCPR.org, Environmentalhealth.CA Here some quotes "Many are unaware of poisoning caused by reusing plastic water bottles". "Theres going to be a day when when we have to import water" -calvin louie.

Thanks for your time. You can reach me at REALM's address, or email me at [xitlali.s.21@realmcharterschool.org](mailto:xitlali.s.21@realmcharterschool.org) or call me (510)862-2873.

Dear Kim Kardashian,

My name is Emily Cruz, i'm a 6th grade student at REALM Middle School in Berkeley, CA and i'm writing about plastic water bottle. We watched a illuminating film "Tapped" on the bottled water industry impact on drought, the harmful effects of the BPA in PET & bottled water, the greed of Nestle, Coca-Cola, Pepsi, and privatization of groundwater sources.

I believe that Nestle is selling dangerous plastic water bottles. This is really important to me because it could affect peoples health. Also it could affect people by having birth problem's.

Cancer is caused by the Nestle water bottle. It's bad because it can kill people. Birth defects is caused by the plastic of the water.It's bad because is not healthy for baby's.

It's dangerous because not long ago everyone seem to care about plastic, disposable, water bottle.Now still million of people hooked on the plastic water bottles are bad and it could hurt people.

Plastic poison one million plastic cups are handed out to the U.S.A airlines flight every 6 hours but it could also be killing us. It could birth problems or affect people.

I got find all this information at [Breastcancerfund.org](http://Breastcancerfund.org) , [environmetalhealth.ca](http://environmetalhealth.ca) , [flourishollhe.org](http://flourishollhe.org) , [wndu.com](http://wndu.com) , [scpr.org](http://scpr.org). Also if you want to see this information on these websites.

There's going to be a day when we have to import water by a drought. It's bad because people want to have/drink water. I realize your schedule is busy, but i would love a response or a email to [emily.c.21@realmcharterschool.org](mailto:emily.c.21@realmcharterschool.org)

You can send a letter to our school, and i can also be reached by phone at (510)860-1189. I will contact your office during the week of (1-2 weeks before the visit) to confirm the details of the appointment.

Thank you for considering my request to change the water from the nestle plastic bottles.

Sincerely,

Emily Cruz

Dear Kim Kardashian,

My name is Emily Cruz, i'm a 6th grade student at REALM Middle School in Berkeley, CA and i'm writing about plastic water bottle. We watched a illuminating film "Tapped" on the bottled water industry impact on drought, the harmful effects of the BPA in PET & bottled water, the greed of Nestle, Coca-Cola, Pepsi, and privatization of groundwater sources.

I believe that Nestle is selling dangerous plastic water bottles. This is really important to me because it could affect peoples health. Also it could affect people by having birth problem's.

Cancer is caused by the Nestle water bottle. It's bad because it can kill people.

Birth defects is caused by the plastic of the water.It's bad because is not healthy for baby's.

It's dangerous because not long ago everyone seem to care about plastic, disposable, water bottle.Now still million of people hooked on the plastic water bottles are bad and it could hurt people.

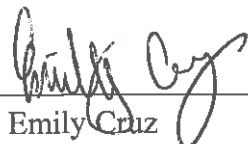

Plastic poison one million plastic cups are handed out to the U.S.A airlines flight every 6 hours but it could also be killing us. It could birth problems or affect people.

There's going to be a day when we have to import water by a drought. It's bad because people want to have/drink water. I realize your schedule is busy, but i would love a response or a email to [emily.c.21@realmcharterschool.org](mailto:emily.c.21@realmcharterschool.org)

You can send a letter to our school, and i can also be reached by phone at (510)860-1189. I will contact your office during the week of (1-2 weeks before the visit) to confirm the details of the appointment.

Thank you for considering my request to change the water from the nestle plastic bottles.

Sincerely,

  
Emily Cruz

Washington, DC 20500

I'm writing about the chemicals that get in our water, I'm a 6th grader at REALM Charter Middle School, California, and I'm concerned about our health.

I believe that Nestle water bottles have chemicals in our water that makes us sick and that gives us cancer, and might even make us die.

Chemicals, the plastic that they use to make the bottle part has chemicals in it that makes us sick or can give us cancer.

Droughts, Nestle takes water from specific places and takes all their water and leaves that city/state in a drought.

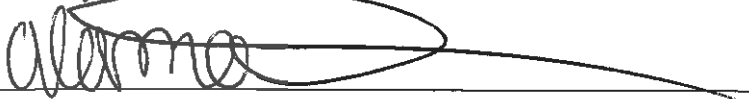

Lying, Nestle lies and says that they get it from the mountains but 40% of that is just plain old tap water.

Fish Population, they dump all the plastic in the ocean and the fish start eating the plastic and the fish get sick we catch that fish we eat the fish and we get sick because we are basically eating plastic. Cancer, the plastic leaks into our water and it has BPA, PET, and PETE that gives us cancer.

I realize your schedule is busy, but I would love a response or a call to (510)-860-1513 or a email at [alana.burt@realmcharterschool.org](mailto:alana.burt@realmcharterschool.org).

Thank you for considering my request to change the plastic so it doesn't have those nasty chemicals in them so no one will get cancer.

Sincerely,

Flint Hills Resources  
2825 Suntide Rd  
Corpus Christi, TX

Dear Flint Hills Resources,

Hello my name is Cassandra I am typing this because me and my 6th grade class watched TAPPED. I am very upset because your company HAVE BEEN LYING TO CONSUMERS like mothers, elders, even CHILDREN. AND KNOW I KNOW NOT TO BUY ANY PLASTIC WATER BOTTLES EVER AGAIN.

Companies who lie are lying to themselves, too. Activists will ensure THAT YOU GET SHUT DOWN FOR TAKING LIVES AWAY AND NEARLY KILLING PEOPLE with your chemical pollutants.

You already know BPA CAUSES CANCER AND YOU HAVE BEEN LYING TO INNOCENT PEOPLE about the impacts of your products on the people who lives nearby in Corpus Christi, TX, as well as the consumers who buy and are poisoned by the leaching of chemicals into the bottles - they have NO idea.

Who would ever do that to there own families and friends? OH YEAH YOU AND NESTLE

YOURS,

CASSANDRA G
